

ROBODARSHAN

Learning Portal — Member User Manual

A guide to registering, learning, earning XP,
and growing from Member to Rookie.

1. Welcome

This manual explains how the Robodarshan Learning Portal works for a **Member** — the starting rank every registered student begins at. It covers how to register, how the dashboard works, how Sessions, Topics, Quizzes and Projects work, how admin approval fits in, and exactly what it takes to be promoted from Member to Rookie.

Tip: keep this manual handy during your first few weeks on the portal. Most “why is this locked?” questions are answered in Sections 6–8.

2. Getting Started: Registration

2.1 Signing in

Go to the Robodarshan website and click **Login**. You will be asked to sign in with Google. Only accounts on the institute domain **@students.iests.ac.in** are accepted — signing in with any other Google account will be rejected automatically.

2.2 Completing your profile

The very first time you log in, you will be taken to a **Complete Registration** form before you can access anything else. You will be asked for:

- **Institute Email** — filled in automatically from your Google login (read-only).
- **Full Name**
- **Mobile Number**
- **Enrollment Number**
- **Personal Email**
- **Profile Picture** — a photo used across the site (dashboard, and later, the Team page if you become a Veteran).

Once submitted, you are registered as a **Member** with 0 XP and taken straight to your Dashboard.

You only need to do this once. From then on, logging in takes you directly to your Dashboard.

2.3 Editing your details later

If any of your details change, open your **Dashboard** and click **Edit** on the Edit Profile card. You can update your Name, Mobile Number, Enrollment Number and Profile Picture at any time. Your **Institute Email cannot be changed** — it is how the system recognizes your login. Every change you make is recorded so the club's admin can review it if needed.

The same card also has a **Delete Account** option, under Danger Zone, if you ever want to permanently remove your profile and all your progress. This cannot be undone.

3. Your Dashboard

Your Dashboard is your home base. It shows:

- Your **avatar, name, rank badge** and **institute email**.

- Your **Learning Progress bar** — how much XP you have and, while you're still a Member, how much more you need to become a Rookie.
- Your **Enrollment Number**.
- A **Go to Learning Portal** button — this takes you to the Stages, where all the actual learning content lives.
- The **Edit Profile** card described above.

The top navigation bar also gives you quick access to Events, Merch, About, Gallery, Contact, Team, the Study Portal (Learning Portal), and Logout.

4. The Rank System

Every account has one of five ranks. As a new member, you'll only ever interact with the first two directly — the rest are shown here for context.

Rank	How you get there	What it means
Member	Automatic, right after registration.	Starting rank. Full access to all learning content, but Sessions and Projects need admin approval before they count.
Rookie	Automatic, once your XP crosses the club's threshold (see Section 10).	Trusted rank. Your Sessions and Projects are approved instantly — no more waiting on an admin. You also get assigned a Trainee as a mentor and may receive a hardware kit.
Trainee	Assigned manually by a Veteran or Admin.	Mentors one or more Rookies and manages their kit checkout.
Veteran	Assigned manually by an Admin.	Approves Sessions/Projects for Members, assigns Rookies to Trainees, posts club Announcements, and appears on the public Team page as a Core Member.
Admin	Set up directly in the system.	Full administrative access, including reviewing account changes.

Trainee, Veteran and Admin ranks are never self-assigned or bought with XP — they are given out by the club. Only the Member → Rookie step happens automatically.

5. The Learning Portal & Stages

Click **Go to Learning Portal** (or **Study Portal** in the nav bar) to see the four Stages that make up the curriculum. Each stage page shows three sections: **Sessions**, **Topics** and **Projects** — with a progress bar for each.

Stage	Focus
Stage 1 — Robotics Beginner	BUILD
Stage 2 — Robotics Intermediate	CONTROL
Stage 3 — Advanced Robotics	AUTONOMY

Stage	Focus
Stage 4 — Professional & Research Robotics	PROFESSIONAL / R&D

There is **no stage-to-stage lock** — you can open and study any stage's material at any time. What is gated (and explained below) is when a specific item's checkbox unlocks and when it counts toward your XP.

6. Sessions — Attendance & Admin Approval

Sessions represent live/offline club sessions you attend. Expand a session card and you'll see a **Mark Attendance** checkbox.

- 1 Tick the box to submit your attendance. As a Member, this goes to **Pending admin approval**.
- 2 A Veteran or Admin reviews it and marks it **Verified**.
- 3 The moment it's verified, its XP is credited to your account automatically — you don't need to do anything else.

Rookie and above: your Mark Attendance goes straight to **Verified** and XP is credited immediately — no waiting on an admin.

7. Topics (Lessons) — Study Material, Quiz & Completion

Expanding a Topic always shows exactly three things:

- **Study Material** — a button that opens the topic's PDF.
- **Quiz** — a short set of questions about the topic.
- A **completion checkbox**.

7.1 Unlocking the checkbox

A Topic's checkbox is disabled until **both** of these are true:

- You have **submitted attendance** for that stage's Session(s) (it does not need to be admin-approved yet — just submitted).
- You have **attempted the Topic's quiz at least once**.

Once both are true, ticking the checkbox marks the topic complete **immediately** — Topics are the one item type that never needs admin approval, for any rank.

8. Projects — Submission & Admin Approval

Projects work like Sessions: study the requirements/instructions, open the PDF study material, attempt the quiz at least once to unlock the checkbox, then click **Submit for Review**.

- 1 As a Member, your submission is marked **Pending admin approval**.
- 2 A Veteran or Admin reviews your project and marks it **Verified**.
- 3 XP is credited automatically the moment it's verified.

Rookie and above: Project submissions are auto-verified immediately, same as Sessions.

9. Quizzes in Detail

- Every Topic and Project has its own short quiz.
- **Your score never affects XP** — quizzes exist to unlock the completion checkbox and to help you check your own understanding, nothing more.
- You can attempt a quiz **as many times as you like**. Every attempt is saved to your history so you can see how you improved.
- After checking your answers, correct/incorrect options stay highlighted on screen until you press **Attempt Again** to retry.

10. XP, Progress & Becoming a Rookie

Every verified Session, Topic and Project carries an XP value. Your Dashboard's progress bar always reflects your live total.

10.1 The Member → Rookie threshold

As a Member, the progress bar shows how much XP stands between you and becoming a **Rookie**. The threshold is calculated automatically by the system from the curriculum itself (roughly: finishing everything in Stages 1 and 2, plus attending the Stage 3 session) — you don't need to track an exact number yourself, just keep completing sessions, topics and projects and watch the bar fill up.

The moment your XP crosses that threshold, you are **promoted to Rookie automatically** — no request or approval needed.

10.2 What changes once you're a Rookie

- Your own Session and Project submissions are **auto-verified** instantly — no more waiting on an admin.
- You are assigned a **Trainee** as your personal mentor (visible on your Dashboard).
- You may be issued a **hardware kit**, tracked and returned through your Trainee.
- Your XP bar becomes a simple “keep earning XP” tracker — there's no further automatic promotion; Trainee/Veteran/Admin are assigned by the club directly.

11. Announcements

The club's Home page has an Announcements section, posted by Veterans, with a title, details and optional image. Check it periodically for club updates — no login is required to view it.

12. Quick Reference

Item	Unlocks when...	Counts as done when...
Session	Always available	Submitted, then admin-verified (auto for Rookie+)
Topic	Session(s) submitted AND quiz attempted once	Checkbox ticked (always instant, no approval)

Item	Unlocks when...	Counts as done when...
Project	Quiz attempted once	Submitted, then admin-verified (auto for Rookie+)
Quiz	Always available	Never “completes” — attempt as many times as you like

If something you expect to be unlocked still looks disabled, check the tooltip/label on the checkbox — it always tells you exactly what's still missing (e.g. “Mark Session Attendance first to unlock” or “Attempt the quiz at least once to unlock”).
